

The figure displays a 5x2 grid of bar charts, where each row corresponds to a data type and each column corresponds to a variable ('type' and 'value'). The y-axis for each chart represents the count of occurrences. The data is as follows:

Data Type	type (count)	value (count)
missing	15000	0.0
numeric	200	2,000
categorical	200	2,000
datetime	200	2,000
boolean	200	2,000
